TO WHOM IT MAY CONCERN

This is to confirm that **Tech4Life Enterprises** extends its full support to the project titled *"SehatAI"*, being developed by the following students of the **Department of Computer Science, Government College University Hyderabad** under the mentorship of **Dr. Dodo Khan (AI Mentor):**

- Azka Fatima (BSAI-2024-011)

- Asia Parveen (BSAI-2024-022)

- Tooba Rani (BSAI-2024-043)

The project is being presented at **Uraan Pakistan Techothon 1.0** under the **Healthcare AI Problem Statements** track and focuses on the following innovative solutions:

- **AI-based X-ray/Image Analysis** for Tuberculosis (TB) and Pneumonia detection.

- **Prescription Digitization and Validation System.**

- **Risk Scoring Model** for Diabetes and Heart Disease.

As a leading industry partner, **Tech4Life Enterprises** is committed to fostering innovation and supporting young talent in technology and applied research. We are pleased to provide domain expertise, mentorship, and industry guidance to help the students refine their ideas and transform them into impactful solutions.

We recognize the potential of this initiative and are ready to collaborate further in taking the project forward beyond the competition stage, ensuring that it aligns with real-world healthcare applications and industry standards.

We wish the student team, their AI mentor, and the university great success in this endeavor and look forward to working together for innovation and societal impact.

Sincerely,

Dr. Shariq Khoja, CEO
Tech4Life Enterprises
